

M. Ammar Hanif

Lead Data & AI Automation Engineer

US | sabih0364@gmail.com | +15855844775 | linkedin.com/in/ammammar-hanif

Professional Summary

Highly accomplished Lead Data & AI Automation Engineer with 4+ years of experience in designing, building, and optimizing scalable data pipelines and modern cloud-based architectures. Expertise in developing robust API integrations, analytical solutions, and process automation tools, ensuring data reliability, accuracy, and security. Proficient in Python, SQL, AWS, Databricks, Spark, and Airflow, with a strong commitment to technical documentation, monitoring, and effective communication across technical and business teams. Demonstrates a proactive approach to identifying optimization opportunities and leveraging AI tools for enhanced productivity.

Skills

Programming & Scripting:	Python, SQL, Scala, Java, C++, Go, TypeScript
Cloud & Data Platforms:	AWS, Databricks, Snowflake, Apache Airflow, Spark, Supabase, Terraform, Lakehouse on S3, PostgreSQL, MySQL, SQL Server, MongoDB, DynamoDB, Redshift
Data Engineering & AI:	Data Engineering, AI integration, cloud platforms, system architecture, Data reliability, Data accuracy, Data availability, Data security, Monitoring, Process automation, API integrations
Business Intelligence & Visualization:	Power BI, Tableau, Domo, Matplotlib, Seaborn
DevOps & Operations:	Git, CI/CD, Jenkins, Linux, REST APIs
Professional & Technical Practices:	Technical documentation, Communication, System and software engineering architecture principles, Best practices, Analytical solutions, Performance optimization

Professional Experience

Mavericks United	02/2026 - Present
------------------	-------------------

Lead Data & AI Automation Engineer

Technologies: AI, Automation, Cloud, Python, SQL, AWS, React, TypeScript, Supabase, Databricks, Spark, Monitoring

- Led enterprise-wide AI strategy and automation initiatives, architecting and delivering AI-powered systems to automate business development, sales, operations, and internal workflows.
- Designed and implemented scalable data pipelines and API integrations using Python, AWS, Databricks, and Spark, ensuring high data reliability and performance for critical business functions.
- Established robust monitoring and alerting systems for AI automation platforms, enhancing data accuracy, availability, and security across all deployed solutions.
- Authored comprehensive technical documentation for complex AI and data automation systems, facilitating seamless knowledge transfer and cross-functional communication.

Mavericks United	2025 - 2026
------------------	-------------

Data Engineer

Technologies: Data Engineering, Snowflake, AWS, Airflow, Domo, SQL, Python

- Re-architected legacy data warehouses for US clients, optimizing data models and improving data quality and integrity for critical business operations.

- Developed and maintained robust ETL pipelines using Apache Airflow, Snowflake, and AWS, enhancing data processing efficiency and reliability.
- Collaborated closely with data science and business teams to deliver analytical solutions, providing actionable insights through data analysis and visualization.
- Implemented process automation for data ingestion and transformation, significantly reducing manual effort and improving data workflow scalability.

Clarity Labs

2023 - 2024

Data Engineering Associate

Technologies: Data Engineering, AWS, Snowflake, Airflow, Power BI, Tableau, Python, SQL

- Constructed and optimized ETL pipelines on AWS and Snowflake, supporting customer insights and segmentation warehouses for enhanced business intelligence.
- Utilized Python and SQL to develop data transformation scripts, ensuring data accuracy and consistency for downstream analytical reporting.
- Contributed to the design of cloud-based data architectures, focusing on scalability and cost-efficiency for various data projects.
- Assisted in establishing data monitoring procedures, ensuring the availability and integrity of critical datasets for business analysis.

Freelancer

01/2021 - 01/2023

Data Engineering & BI Consultant

Technologies: Data Engineering, AWS, Snowflake, Lambda, Power BI, Tableau, Python, SQL, API integrations

- Designed and implemented real-time data pipelines integrating APIs with AWS Lambda and Snowflake for IoT and retail clients, ensuring immediate data availability.
- Developed custom API integrations to streamline data ingestion from diverse sources, enhancing data accessibility and operational efficiency.
- Provided technical documentation and guidance to clients on data engineering best practices and cloud architecture principles.
- Leveraged SQL and Python to build robust data solutions, supporting business intelligence initiatives and delivering actionable insights.

Education

University of South Asia, Lahore

2025

BS in Computer Science
