Professional Summary

Highly analytical and strategic Principal Competitive Intelligence professional with 10+ years of experience driving market advantage through in-depth competitive analysis and impactful product marketing strategies. Proven expertise in the search market, translating complex technical features into compelling business value for sales engineering and executive leadership. Adept at building and implementing competitive intelligence programs, developing battlecards, conducting win/loss analysis, and defining strategic positioning to counter market trends and competitor actions. Deep technical background in AI/ML, Python, Go, and observability, enabling a nuanced understanding of advanced search technologies like elasticsearch and their competitive landscape. Committed to empowering sales teams and influencing product direction through actionable insights and robust technical marketing.

Skills

Core Skills:	Competitive Intelligence, Product Marketing, Sales Engineering, Technical Marketing, Search Market Analysis, Competitive Analysis, Win/Loss Analysis, Battlecards, Positioning, Market Trends, Go-to-Market Strategy, Strategic Planning, Market Research, SWOT Analysis, Elasticsearch, Observability, Information Retrieval, Distributed Search, AI Search, Log Management, APM, Monitoring, Python, Go, C++, JavaScript, SQL, PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Flask, Angular, PostgreSQL, MongoDB, RESTful APIs, AWS, Docker, Git, Jupyter Notebooks, VS Code, Artificial Intelligence (AI), Machine Learning (ML), Data Science, Linear Algebra, Algorithms, Statistics, Model Deployment, Data Analytics Automation, Quality Control
---------------------	---

Professional Experience

AMD | Santa Clara, CA Jan 2024 - Present

Principal Competitive Intelligence Manager, Search & AI

Technologies: Python, Elasticsearch, AWS, Docker, AI/ML, Observability

- Orchestrated a comprehensive competitive intelligence program for AI-accelerated search solutions, performing in-depth competitive analysis of market trends and competitor positioning to inform product marketing and sales engineering strategies.
- Authored and disseminated critical battlecards and technical marketing content, leveraging deep technical understanding of elasticsearch and other search market technologies to empower sales teams with compelling differentiation and win/loss insights.
- Implemented an advanced observability framework to continuously monitor competitor product launches, pricing, and messaging, providing timely insights to executive leadership for strategic adjustments and proactive positioning.
- Collaborated cross-functionally to define competitive positioning for new AI search features, directly influencing go-to-market plans and contributing to a 15% increase in competitive win rates within the search market.

NVIDIA | Santa Clara, CA Jan 2021 - Dec 2023

Lead Sales Engineer, AI/ML Search Solutions

Technologies: Python, TensorFlow, PyTorch, JavaScript, Flask, PostgreSQL, AI/ML

- Provided expert sales engineering support for AI/ML-driven search platforms, translating complex technical features into compelling business value propositions for enterprise clients, resulting in a 25% increase in successful proofs-of-concept and improved competitive positioning.

- Conducted comprehensive competitive analysis of AI/ML search offerings, creating detailed battlecards and technical marketing materials that empowered sales teams to effectively position NVIDIA solutions against key competitors in the search market.
- Led win/loss analysis initiatives, gathering customer feedback and market intelligence to inform product development and refine competitive positioning strategies, enhancing overall product marketing effectiveness.
- Developed and delivered technical presentations and demonstrations, showcasing the power of AI/ML in search and addressing complex customer challenges, often involving deep dives into system observability and performance metrics.

Google | Mountain View, CA Jan 2018 - Dec 2020

Senior Technical Product Analyst, Search Technologies

Technologies: Python, Go, C++, SQL, Angular, AI/ML

- Analyzed competitive search technologies and market trends for Google Cloud Search, providing critical competitive intelligence that informed product roadmap decisions and enhanced product marketing efforts.
- Collaborated with product management and engineering teams to define technical positioning for new search features, ensuring clear differentiation and alignment with market needs within the search market.
- Contributed to the development of internal sales engineering enablement tools and documentation, translating complex search algorithms and AI capabilities into accessible content for field teams.
- Utilized Python and Go to develop prototypes for competitive feature analysis and data visualization, enhancing the team's ability to perform rapid competitive analysis and track market shifts in the search market.

Microsoft | Redmond, WA Jan 2016 - Dec 2017

Technical Product Analyst, Enterprise Search

Technologies: Python, C#, SQL, Azure, Data Analytics

- Supported the competitive analysis of enterprise search solutions, researching competitor offerings and contributing to internal reports on market trends and competitive landscapes.
- Assisted product marketing in developing technical content and messaging for enterprise search products, ensuring accuracy and highlighting key differentiators for sales engineering teams.
- Gained foundational experience in sales engineering support, helping to prepare technical demonstrations and answer customer queries regarding product capabilities and competitive advantages in the search market.
- Monitored industry developments and competitor announcements, contributing to early-stage competitive intelligence gathering for the search market and informing initial positioning strategies.

Certifications

- Elastic Certified Engineer
- Competitive Intelligence Professional (CIP) Certification | SCIP
- Product Marketing Alliance Certified Product Marketing Manager
- Go Programming Language Certification | Coursera
- Observability Practitioner Certification | Dynatrace

Education

Stanford University

Master of Science in Computer Science, specializing in Information Retrieval and Search Technologies 2017

University of California, Berkeley

Bachelor of Science in Computer Science 2016
