PROFESSIONAL SUMMARY

Experienced Lead Software Engineer with a proven track record of building and optimizing complex backend systems, API integrations, and CI/CD pipelines. Proficient in a wide range of technologies including JavaScript, TypeScript, Python, React, Next.js, Vue 3, Node.js, Express, REST APIs, MySQL, MongoDB, Supabase, and PostgreSQL. Skilled in managing production deployments, database migrations, and live debugging across cloud and on-premise environments. Passionate about driving architectural improvements, code reviews, and systematic debugging practices to enhance application performance and reliability.

TECHNICAL SKILLS

JavaScript, TypeScript, Node.js, Express, React, Next.js, Vue 3, REST APIs, MySQL, MongoDB, Supabase, PostgreSQL, GitHub Actions, CI/CD, Vercel, Azure, Linux, Ubuntu, Nginx, Git, Postman, Figma, Electron, Python

PROFESSIONAL EXPERIENCE

Junior Web Developer — MST Developers (Jan 2023 - Present)

Technologies: React, Next.js, Supabase, PostgreSQL, MySQL, GitHub Actions, Vercel, Azure, Ubuntu, OpenCart, SuiteCRM, REST APIs

On Finmile (delivery optimization platform, React Next.js Supabase PostgreSQL) led repository workflows, pull request reviews, and version control strategy across the development team; Designed and implemented backend schemas, REST APIs, and data workflows. Optimized MySQL queries achieving up to 6x faster load times and a 30% reduction in order errors for a major WooCommerce client. Automated inventory workflows via custom API integrations, recovering 3-4 hours of manual work daily and eliminating sync errors. Reduced production bugs by ~50% through architectural improvements, code reviews, and systematic debugging practices. Built and maintained CI/CD pipelines with GitHub Actions; cut deployment release cycles from 2 days → under 6 hours across staging and production environments. Managed production deployments, database migrations, environment configuration, and live debugging across client systems hosted on Vercel, Azure Ubuntu VPS, and shared hosting. Boosted application performance 80%+ via caching strategies, asset optimization, and mobile responsiveness improvements. Built custom modules for OpenCart and SuiteCRM to automate product management workflows and improve CRM usability.

Software Engineering Intern — MST Developers (Oct 2022 - Dec 2022)

Technologies: Backend Development, API Design

Contributed to backend development, debugging, and testing for live client systems. Assisted in API design and real-world system validation — converted to full-time.

EDUCATION

BS Software Engineering in Software Engineering — University of Central Punjab

CERTIFICATIONS

Python Programming (University of Michigan - Coursera)
