

Harmain Ali

Manager, AI Engineer | Anthropic Claude Platform Specialist | Generative AI Leader

US | harmain.dev@gmail.com | +1 (650) 555-1234 | <https://www.linkedin.com/in/harmain-ali>

Professional Summary

Highly accomplished and results-driven Manager, AI Engineer with 8+ years of experience in leading the development, deployment, and optimization of Artificial Intelligence (AI) and Machine Learning (ML) models in production environments. Proven expertise in driving the adoption of advanced AI platforms, including the Anthropic Claude platform, and collaborating with cross-functional teams to design innovative AI integrations and optimize workflows. Proficient in Python, C++, and JavaScript, with deep understanding of data science principles, linear algebra, algorithms, and statistics. Adept at leveraging frameworks like PyTorch and TensorFlow for scalable solutions and experienced in web development using Flask and Angular for interactive ML applications. Committed to ensuring high performance and reliability through robust quality control and automated data analytics pipelines.

Skills

Core Skills: Python, C++, JavaScript, SQL, PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, Plotly, Flask, Angular, ASP.Net Core, PostgreSQL, MongoDB (noSQL), RESTful APIs, Artificial Intelligence (AI), Machine Learning (ML), Data Science, Linear Algebra, Algorithms, Statistics, Quality Control, Model Deployment, Data Analytics Automation, Git, Jupyter Notebooks, VS Code, Google Colab, Docker, AWS, Anthropic Claude platform, Generative AI

Professional Experience

AMD Jan 2024 - Present

Manager, AI Engineer

Technologies: Python, PyTorch, TensorFlow, C++, AWS, Docker, SQL, noSQL

- Led a team of AI engineers in the development and deployment of advanced Artificial Intelligence (AI) models for optimizing GPU performance, resulting in a 15% improvement in processing efficiency across key product lines.
- Drove the adoption and integration of the Anthropic Claude platform, designing innovative AI integrations and optimizing workflows to enhance generative AI capabilities and accelerate project delivery.
- Implemented robust quality control protocols and established automated monitoring systems to meticulously track output data quality in production environments, reducing critical errors by 20% and ensuring model integrity.
- Architected and developed scalable ML/AI tool development pipelines using Python and C++, integrating complex algorithms and linear algebra concepts to enhance model training and inference capabilities.
- Collaborated with cross-functional teams to automate data analytics processes, identifying critical opportunities for ML and AI applications that drove strategic product enhancements and operational efficiencies.

NVIDIA Jan 2021 - Dec 2023

Machine Learning Engineer

Technologies: Python, TensorFlow, NumPy, Pandas, JavaScript, Flask, PostgreSQL

- Developed and deployed machine learning models for real-time image recognition and natural language processing, significantly improving data processing speeds by 25% using TensorFlow and Python.
- Contributed to ML/AI tool development, creating custom libraries that integrated advanced statistics and algorithms for feature engineering and model evaluation, enhancing overall model performance.

- Designed and implemented interactive web development interfaces for ML model visualization and interaction using JavaScript and Flask, enhancing user accessibility and data interpretation for stakeholders.
- Established rigorous quality control measures for deployed models, including continuous monitoring of output data quality in production environments to ensure model integrity and performance, reducing post-deployment issues by 18%.

Google

Jan 2018 - Dec 2020

AI Developer

Technologies: Python, Scikit-learn, C++, SQL, Angular, ASP.Net Core

- Developed core Artificial Intelligence (AI) components for Google Cloud services, focusing on predictive analytics and anomaly detection using Python and C++, improving system accuracy by 10%.
- Engineered and deployed machine learning models, applying principles of linear algebra and statistics to optimize data-driven decision-making processes, leading to more robust analytical tools.
- Collaborated on web development projects, building user interfaces with Angular and ASP.Net Core to expose ML model functionalities and insights to internal stakeholders, improving data accessibility.
- Participated in the design of data pipelines for automating data analytics, ensuring data quality and consistency for downstream ML applications and reducing manual data preparation time by 20%.

Certifications

-
- Machine Learning Engineering with TensorFlow on Google Cloud | Google Cloud
 - Deep Learning Specialization | DeepLearning.AI (Andrew Ng)
 - Professional Certificate in Python for Data Science and AI | IBM
 - Advanced JavaScript and Front-End Development | Udemy

Education

Stanford University	2017
Master's in Computer Science, specializing in Artificial Intelligence	
University of California, Berkeley	2016
Bachelor of Science in Computer Engineering
