

Dear Hiring Manager at cockroachlabs,

Hiring Manager,

I am writing to express my enthusiastic interest in the Staff Product Manager position at Cockroach Labs. With over six years of experience leading the development and deployment of advanced AI/ML solutions at AMD, NVIDIA, and Google, I am confident in my ability to drive the "Efficient & Always-on Transactions" user journey and contribute to CockroachDB's mission of delivering globally consistent, highly available, and scalable database solutions.

My background aligns strongly with your emphasis on an "AI-first mindset" and performance optimization. At AMD, I led the development and deployment of AI models that improved GPU processing efficiency by 15% and established automated monitoring systems to reduce critical errors by 20%. Similarly, at NVIDIA, I significantly improved data processing speeds by 25% through advanced machine learning models. My experience architecting scalable ML/AI tool development pipelines and ensuring data quality in production environments directly translates to the systems thinking and operational trust critical for CockroachDB's core promise.

I have a proven track record of partnering with cross-functional engineering teams to deliver strategic product enhancements and measurable outcomes. My work at Google involved developing core AI components for cloud services and building user interfaces to expose ML functionalities to internal stakeholders, demonstrating my ability to act as the voice of the customer and communicate complex technical trade-offs. I am adept at leveraging quantitative data for decision-making, from performance benchmarks to latency distributions, to drive continuous improvement and address customer pain points within enterprise environments.

I am eager to apply my deep technical expertise in AI/ML, performance engineering, and data-driven strategy to define and execute the roadmap for CockroachDB's foundational capabilities. I am enthusiastic about the opportunity to contribute to a category-defining product and deliver lasting impact.

Sincerely,

Harmain Ali
