

Dear Hiring Manager at cockroachlabs,

Dear Hiring Manager,

I am writing to express my strong interest in the Strategy & Operations Manager, GTM position at Cockroach Labs. With a background spanning AI model development, deployment, and cross-functional collaboration at industry-leading technology companies, I bring both the technical fluency and operational rigor your team requires to drive revenue transformation through data-driven strategy and AI-powered workflows.

Throughout my career at Google, NVIDIA, and AMD, I have developed deep expertise in designing, deploying, and iterating on AI systems that deliver measurable business impact. At AMD, I led the development and deployment of advanced AI models that improved GPU performance by 15% while architecting scalable ML pipelines and establishing automated monitoring systems that reduced critical errors by 20%—directly demonstrating my ability to translate complex technical work into quantifiable outcomes. At NVIDIA, I designed interactive web interfaces to visualize ML model performance and collaborated across teams to identify strategic applications for machine learning, experience that directly translates to partnering with senior leaders and translating analytical complexity into actionable insights. My work with SQL, Python, and data pipeline automation across all three roles has equipped me with the technical foundation to query databases, build financial models, and measure AI initiative impact.

Beyond technical capability, I have consistently demonstrated the bias toward action and high agency this role demands. I have repeatedly moved from problem identification to solution deployment—whether architecting data analytics automation at Google, establishing quality control protocols at NVIDIA, or implementing production monitoring systems at AMD. My experience collaborating with cross-functional teams to identify ML opportunities and drive adoption mirrors the partnership and program execution required to reshape how your revenue organization operates.

I am genuinely excited about the opportunity to apply my AI expertise, analytical rigor, and execution discipline to GTM strategy at Cockroach Labs. I am based in NYC and available to meet the office expectations for this role. I would welcome the opportunity to discuss how my background in deploying AI systems and driving measurable outcomes can contribute to your revenue transformation.

Sincerely,

Harmain Ali

Sincerely,

Harmain Ali
