

Dear Hiring Manager at cockroachlabs,

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer (Full-Stack) position for GTM Tooling at Cockroach Labs. With over 7 years of hands-on software engineering experience spanning cloud-native systems, full-stack development, and infrastructure automation, I am excited about the opportunity to help build the next generation of AI-augmented workflow systems.

Throughout my career, I have developed deep expertise directly aligned with your requirements. At TechCorp Solutions, I have led the development of cloud-native applications and microservices architecture on AWS, establishing CI/CD best practices and deployment pipelines that enable reliable, scalable systems. My experience at Digital Innovations Inc strengthened my full-stack capabilities—I built and maintained complex web applications using React and Node.js while implementing containerization with Docker to improve deployment efficiency. This foundation in both frontend and backend development, combined with my proficiency in PostgreSQL and distributed systems thinking, positions me well to design and implement the intuitive, agent-assisted workflows you're envisioning for GTM OS.

I bring proven ability to work across the full technology stack required for this role. My experience with AWS, Docker, and Kubernetes demonstrates strong cloud infrastructure knowledge. My React expertise directly supports building next-generation UX for seamless human-AI collaboration, while my backend development background in Node.js and database work with PostgreSQL provides the technical depth needed for reliable workflow processing systems. Additionally, my track record of mentoring junior developers and establishing best practices reflects my ability to communicate complex technical concepts clearly—a critical skill for the enablement and consultation aspects of this role.

I am particularly drawn to Cockroach Labs' mission to build infrastructure that simply works at scale. The opportunity to shape a foundational system that redefines how teams operate, combining classical engineering rigor with emerging AI capabilities, aligns perfectly with my passion for building extensible platforms others depend on. I am eager to contribute my technical expertise and collaborative mindset to this ambitious initiative.

Thank you for considering my application. I look forward to discussing how I can contribute to the GTM OS platform.

Sincerely,

Sabih Haider

Sincerely,

Sabih Haider
