

Harmain Ali

New York, NY | harmain.ali@gmail.com | +1 (650) 555-1234 | <https://www.linkedin.com/in/harmain-ali-gtm-ops>

Professional Summary

Strategic and analytically rigorous GTM Operations Manager with 8+ years of experience driving revenue transformation at high-growth technology companies and tier-one investment banks. Proven expertise in designing and deploying agentic AI workflows, building financial models that translate strategy into measurable revenue impact, and executing cross-functional GTM programs that reshape sales organization performance. Fluent in SQL, LLMs, and prompt engineering with demonstrated ability to synthesize complex data into actionable insights for senior leadership. Track record of moving faster than organizational expectations, owning outcomes end-to-end, and building analytical frameworks that drive pipeline acceleration, deal velocity, and customer relationship expansion. Deep technical fluency combined with relentless bias toward action and deployment.

Skills

Core Skills: GTM Operations, Revenue Transformation, Pipeline Management, Deal Acceleration, Territory Planning, Capacity Planning, Forecasting Models, Customer Relationship Management, Cross-Functional Program Execution, Strategic Partnership, Sales Operations, Revenue Analytics, Agentic Workflows, LLMs, Prompt Engineering, AI Workflow Design, Account Prioritization Agents, Pipeline Intelligence, Customer Health Scoring, Outreach Personalization, AI Automation, Generative AI, GTM Analytics, Financial Modeling, Business Cases, Data Analysis, SQL, Database Querying, Statistical Analysis, Predictive Analytics, Revenue Forecasting, Conversion Rate Analysis, Salesforce, Gong, Outreach, Tableau, Looker, Python, Excel, Google Sheets, Data Warehousing, Strategic Thinking, Analytical Rigor, Financial Acumen, Communication, Leadership, Problem Solving, Project Management, Stakeholder Management, Data-Driven Decision Making

Professional Experience

Cockroach Labs | New York, NY Mar 2024 - Present

Senior Strategy and Operations Manager, GTM

Technologies: SQL, Python, Salesforce, Gong, Outreach, Tableau, LLMs, Prompt Engineering

- Designed and deployed three agentic workflows for account prioritization, pipeline intelligence, and customer health scoring that increased sales team productivity by 18% and accelerated deal velocity by 22%. Measured real performance outcomes through rigorous GTM analytics and iterated on prompt engineering strategies to continuously improve workflow accuracy and adoption across the revenue organization.
- Built comprehensive financial models translating AI initiatives and GTM programs into measurable revenue impact, including pipeline coverage analysis, conversion rate optimization, and rep productivity benchmarking. Presented business cases to senior leadership that informed resource allocation decisions and drove strategic partnership alignment across Sales, Marketing, and Customer Success.
- Owned territory planning and capacity planning analyses using data-driven frameworks, diagnosing organizational bottlenecks and designing solutions that improved sales coverage model efficiency by 15%. Executed cross-functional program implementation end-to-end, coordinating stakeholder adoption and ensuring GTM operations initiatives achieved measurable outcomes.
- Synthesized complex go-to-market performance data through advanced SQL querying and database analysis, surfacing actionable insights that shaped revenue organization structure and target-setting. Demonstrated relentless bias toward action by shipping analyses and workflows that directly influenced real decisions rather than recommendations.

Google | Mountain View, CA Jan 2022 - Feb 2024

Strategy and Operations Manager, Revenue Transformation

Technologies: SQL, Python, Salesforce, Tableau, LLMs, Google Sheets, BigQuery

- Led GTM operations initiatives focused on revenue transformation, designing and implementing agentic workflows for deal acceleration and customer relationship management. Built financial models that quantified pipeline management improvements and deal velocity gains, demonstrating 25% increase in forecast accuracy through advanced statistical modeling and customer relationship analytics.
- Conducted comprehensive GTM analytics across the revenue organization, querying databases and analyzing go-to-market performance data to identify strategic partnership opportunities and operational bottlenecks. Translated complexity into clear, actionable recommendations that informed leadership decisions on territory planning, capacity planning, and sales organization restructuring.
- Developed prompt engineering strategies for LLM-powered business applications, iterating on AI workflows to improve outreach personalization and account prioritization accuracy. Demonstrated high agency and ownership mentality by taking full accountability for AI workflow validation, refinement, and deployment across cross-functional teams.
- Executed multiple GTM programs end-to-end including territory redesign, capacity planning initiatives, and forecasting model enhancements. Built working relationships with senior stakeholders across Sales, Marketing, and Data Engineering, earning influence through analytical rigor and speed of execution in delivering revenue transformation outcomes.

Microsoft | Seattle, WA Jun 2020 - Dec 2021

Operations Manager, Go-to-Market Strategy

Technologies: SQL, Python, Salesforce, Gong, Excel, Power BI, Azure

- Owned GTM operations and strategy initiatives supporting revenue transformation across enterprise sales division. Built financial models for pipeline management and deal acceleration programs, analyzing conversion rates and rep productivity metrics to optimize sales organization structure. Delivered business cases that drove strategic partnership decisions and resource allocation across Sales and Marketing.
- Conducted advanced GTM analytics using SQL database querying and Python data analysis to surface insights on go-to-market performance. Designed territory planning and capacity planning frameworks that improved sales coverage efficiency by 20% and informed strategic decisions on sales organization restructuring.
- Executed cross-functional program implementation for customer relationship management system enhancements and sales process optimization. Demonstrated bias toward action by shipping operational improvements that achieved measurable outcomes rather than theoretical recommendations, with direct impact on pipeline acceleration and deal velocity.
- Collaborated with senior revenue leaders as analytical thought partner, presenting findings on forecasting models, conversion rate analysis, and customer relationship expansion opportunities. Built track record of delivering GTM operations insights that shaped strategic decisions and drove organizational alignment.

Goldman Sachs | New York, NY Jul 2018 - May 2020

Senior Analyst, Strategy and Operations

Technologies: SQL, Python, Excel, VBA, Tableau, Bloomberg Terminal

- Developed sophisticated financial models and business cases for strategic initiatives across investment banking division, demonstrating deep analytical and financial modeling expertise. Conducted data-driven analysis to support territory planning, capacity planning, and resource allocation decisions for revenue-generating teams.
- Executed complex analytical projects involving database querying, statistical analysis, and predictive modeling to inform go-to-market strategy and customer relationship management decisions. Synthesized findings into clear, actionable recommendations for senior leadership, translating complexity into strategic insights.
- Collaborated on cross-functional program execution initiatives, diagnosing operational bottlenecks and designing solutions that improved team productivity and deal acceleration. Demonstrated high agency and ownership mentality

by taking full accountability for project outcomes and stakeholder communication.

- Built strong relationships with senior stakeholders across business divisions through analytical rigor, clear communication, and bias toward action. Developed reputation for delivering insights that actually influenced strategic decisions and drove measurable business impact.

McKinsey & Company | New York, NY Aug 2016 - Jun 2018

Associate, Strategy and Operations

Technologies: SQL, Python, Excel, Tableau, R

- Conducted strategic analyses and financial modeling for Fortune 500 technology and financial services clients, building business cases that translated operational improvements into measurable revenue impact. Developed expertise in pipeline management, deal acceleration, and customer relationship optimization through rigorous analytical frameworks.
- Led cross-functional program execution engagements, diagnosing operational bottlenecks in go-to-market organizations and designing solutions for territory planning, capacity planning, and sales force effectiveness. Demonstrated relentless bias toward action by moving quickly from analysis to implementation and measuring real outcomes.
- Built financial models and business cases supporting strategic partnership decisions and revenue transformation initiatives. Synthesized complex data through advanced analytics and database querying to surface insights that informed client leadership decisions on GTM strategy and organizational structure.
- Developed strong communication and presentation skills through extensive stakeholder engagement with C-suite executives. Demonstrated high agency and ownership mentality by taking full accountability for project quality and client outcomes, building reputation for analytical rigor and strategic impact.

Certifications

- Advanced Financial Modeling and Business Case Development
- LLM Prompt Engineering and Agentic AI Workflow Design
- Salesforce Administrator and Advanced Configuration
- SQL Database Design and Advanced Querying
- Strategic Go-to-Market Operations and Revenue Analytics
- Data Science and Predictive Analytics Specialization

Education

Stanford University

Master of Science in Computer Science with focus on Data Science and AI 2016 **University of Pennsylvania**

Bachelor of Science in Mathematics and Economics 2014
