PROFESSIONAL SUMMARY

Junior Software Engineer with 2+ years of production experience specializing in Python backend development, building robust REST APIs, and crafting dynamic React and Next.js frontend interfaces. Proven ability to optimize relational databases like PostgreSQL and MySQL, and to implement efficient CI/CD pipelines using GitHub Actions, significantly reducing deployment cycles and enhancing system performance across live business operations.

TECHNICAL SKILLS

Python, React, JavaScript, TypeScript, Next.js, PostgreSQL, REST APIs, GitHub Actions, CI/CD, MySQL, Git, Linux, Azure, Vercel, Postman, TailwindCSS

PROFESSIONAL EXPERIENCE

Junior Web Developer — MST Developers (Jan 2023 - Present)

Technologies: React, Next.js, Supabase, PostgreSQL, REST APIs, MySQL, WooCommerce, CI/CD, GitHub Actions, Vercel, Azure, Ubuntu, OpenCart, SuiteCRM

Led repository workflows, pull request reviews, and version control strategy across the development team; Designed and implemented backend schemas, REST APIs, and data workflows. Optimized MySQL queries achieving up to 6x faster load times and a 30% reduction in order errors for a major WooCommerce client. Automated inventory workflows via custom API integrations, recovering 3–4 hours of manual work daily and eliminating sync errors. Reduced production bugs by ~50% through architectural improvements, code reviews, and systematic debugging practices. Built and maintained CI/CD pipelines with GitHub Actions; cut deployment release cycles from 2 days to under 6 hours across staging and production environments. Managed production deployments, database migrations, environment configuration, and live debugging across client systems hosted on Vercel, Azure Ubuntu VPS, and shared hosting. Boosted application performance 80%+ via caching strategies, asset optimization, and mobile responsiveness improvements. Built custom modules for OpenCart and SuiteCRM to automate product management workflows and improve CRM usability.

Software Engineering Intern — MST Developers (3 Months (Pre-hire) - Present)

Technologies: Backend Development, API Design, Debugging, Testing

Contributed to backend development, debugging, and testing for live client systems. Assisted in API design and real-world system validation — converted to full-time.

EDUCATION

BS Software Engineering in Software Engineering — University of Central Punjab

CERTIFICATIONS

Python Programming (University of Michigan - Coursera)
