

Sabih Haider

Backend Software Engineer | Distributed Systems | Scalable Infrastructure

United States | rehanmajeed00345@gmail.com | +92 341 008 4746 | linkedin.com/in/sabih-h

Professional Summary

Accomplished Software Engineer with 2+ years of production experience in designing, developing, and deploying robust backend systems. Proven expertise in building scalable systems, optimizing large scale data systems, and implementing secure API integrations and distributed deployment workflows. Successfully enhanced performance and reliability across diverse client platforms, contributing to critical business operations.

Skills

Languages:	JavaScript, TypeScript, Python
Frontend:	React, Next.js, Vue 3
Backend:	Node.js, Express, REST APIs
Databases:	MySQL, MongoDB, Supabase, PostgreSQL, Large Scale Data Systems
DevOps & Cloud:	GitHub Actions, CI/CD, Vercel, Azure, Linux, Ubuntu, Nginx, Distributed Systems, Scalable Systems, Security
Tooling & Platforms:	Git, Postman, Figma, Electron, WordPress, WooCommerce, OpenCart, SuiteCRM

Professional Experience

MST Developers Jan 2023 - Present

Backend Software Engineer

Technologies: React, Next.js, Supabase, PostgreSQL, MySQL, WooCommerce, API integrations, GitHub Actions, CI/CD, Vercel, Azure, Ubuntu VPS, OpenCart, SuiteCRM, REST APIs

- Architected and implemented robust backend schemas, REST APIs, and data workflows for a delivery optimization platform, ensuring scalable systems and efficient data processing.
- Optimized MySQL queries and managed PostgreSQL databases, achieving up to 6x faster load times and enhancing performance for large scale data systems.
- Developed and maintained CI/CD pipelines with GitHub Actions, significantly reducing deployment cycles and ensuring secure, scalable system deployments across diverse environments.
- Managed production deployments, database migrations, and live debugging for distributed client systems on Vercel and Azure, ensuring high availability and operational security.

MST Developers Oct 2022 - Dec 2022

Software Engineering Intern

Technologies: API design, backend development

- Contributed to backend development, debugging, and testing for live client systems, gaining exposure to scalable system architectures.
- Assisted in API design and real-world system validation, laying groundwork for robust and secure application interfaces.

Certifications

- Python Programming (University of Michigan - Coursera)

Education

University Of Central Punjab	None
BS in Software Engineering
