

Test Candidate M3

US | test_m3_049e15eb-69a7-4668-b180-0b8b6de63527@example.com

Professional Summary

Highly accomplished and results-driven Senior Software Engineer with 8+ years of experience in developing, deploying, and optimizing robust applications, including full-stack solutions with a strong focus on Python backend and React frontend development. Proven expertise in scalable system architecture, robust quality control, and automating data analytics pipelines. Proficient in Python, C++, JavaScript, and React, with deep understanding of data science principles, algorithms, and system design. Adept at leveraging frameworks like PyTorch and TensorFlow for scalable solutions and experienced in modern web development using React, Flask, and Angular for interactive applications. Committed to delivering high-performance, reliable, and user-centric software solutions.

Skills

Core Skills: Python, C++, JavaScript, React, SQL, PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, Plotly, Flask, Angular, ASP.Net Core, PostgreSQL, MongoDB, RESTful APIs, Artificial Intelligence, Machine Learning, Data Science, Linear Algebra, Algorithms, Statistics, Quality Control, Model Deployment, Data Analytics Automation, Git, Jupyter Notebooks, VS Code, Google Colab, Docker, AWS, Frontend Development, Backend Development, Full-Stack Development

Professional Experience

AMD | US Jan 2024 - Present

Senior Software Engineer

Technologies: Python, PyTorch, TensorFlow, C++, React, AWS, Docker, SQL, noSQL

- Architected and led the development of a high-performance web application frontend using React, enhancing user engagement and data visualization for critical GPU performance metrics by 15%.
- Designed and implemented robust quality control protocols for both Python backend services and React frontend components, establishing automated monitoring systems that reduced critical production errors by 20%.
- Developed scalable full-stack applications leveraging Python and C++, integrating advanced algorithms to optimize system capabilities and deliver superior user experiences.
- Collaborated with cross-functional teams to automate complex data analytics processes, identifying and implementing strategic software enhancements that directly contributed to product innovation.

NVIDIA | US Jan 2021 - Dec 2023

Software Engineer

Technologies: Python, TensorFlow, NumPy, Pandas, JavaScript, React, Flask, PostgreSQL

- Developed and deployed full-stack applications, including interactive user interfaces built with React and Python-based backend services, significantly improving data processing speeds by 25% for real-time image recognition.
- Contributed to robust software tool development, creating custom libraries that integrated advanced statistics and algorithms for efficient feature engineering and model evaluation.
- Designed and implemented interactive web development interfaces for ML model visualization and interaction using React and Flask, enhancing user accessibility and data interpretation.

- Established rigorous quality control measures for deployed software, including continuous monitoring of output data quality in production environments to ensure system integrity and performance.

Google | US Jan 2018 - Dec 2020

Software Engineer

Technologies: Python, Scikit-learn, C++, React, SQL, Angular, ASP.Net Core

- Developed core software components for Google Cloud services, focusing on predictive analytics and anomaly detection using Python and C++, improving system accuracy by 18%.
- Engineered and deployed scalable machine learning models, applying principles of linear algebra and statistics to optimize data-driven decision-making processes for internal tools.
- Collaborated on web development projects, building user interfaces with React to expose application functionalities and insights to internal stakeholders, streamlining data access.
- Participated in the design and implementation of data pipelines for automating data analytics, ensuring data quality and consistency for downstream applications.

Certifications

- React - The Complete Guide (incl Hooks, React Router, Redux) | Udemy
- Machine Learning Engineering with TensorFlow on Google Cloud | Google Cloud
- Deep Learning Specialization | DeepLearning.AI (Andrew Ng)
- Professional Certificate in Python for Data Science and AI | IBM

Education

Stanford University

Master's in Computer Science 2017 **University of California, Berkeley**

Bachelor of Science in Computer Science 2016
