Professional Summary

Highly accomplished and results-driven Senior Software Engineer with 8+ years of experience in developing, deploying, and optimizing full-stack applications. Proven expertise in Python backend development, robust API design, and building dynamic user interfaces with React. Proficient in modern web development frameworks, data science principles, and cloud platforms. Adept at leveraging frameworks like Flask and Django for scalable solutions and experienced in creating interactive web applications. Committed to delivering high-performance, reliable, and user-centric software solutions.

Skills

Core Skills: Python, JavaScript, React, Flask, Django, Node.js, TypeScript, HTML5, CSS3, SQL, C++, PyTorch, TensorFlow, AWS, Docker, Kubernetes, Git, CI/CD, RESTful APIs, Microservices, PostgreSQL, MongoDB, MySQL, NoSQL, Agile, Scrum, Jira, VS Code, Unit Testing, Integration Testing, Data Analytics, Machine Learning

Professional Experience

AMD | Santa Clara, CA Jul 2024 - Jul 2026

Lead Software Engineer

Technologies: Python, React, Django, AWS, Docker, PostgreSQL, RESTful APIs

- Led the architectural design and full-stack development of high-performance web applications using Python for robust backend services and React for dynamic, responsive user interfaces, improving system efficiency by 20%.
- Engineered scalable RESTful APIs with Python (Django) to support complex data interactions, ensuring seamless integration with React components and external services.
- Implemented advanced state management and component lifecycle optimization in React applications, resulting in a 15% reduction in page load times and enhanced user experience.
- Collaborated with product and design teams to translate requirements into technical specifications, driving the successful deployment of critical features leveraging modern React patterns and Python microservices.

NVIDIA | Santa Clara, CA Jan 2021 - Jun 2024

Senior Software Engineer

Technologies: Python, React, Flask, JavaScript, MongoDB, Git, AWS

- Developed and maintained interactive web applications, utilizing React for front-end development and Python (Flask) for backend API services, enhancing data visualization and user engagement.
- Contributed to the design and implementation of new features in existing platforms, specifically focusing on React component development and integration with Python-based data processing pipelines.
- Optimized application performance by refactoring React components and implementing efficient data fetching strategies, leading to a 10% improvement in responsiveness.
- Participated in code reviews, mentored junior developers, and ensured adherence to best practices in React and Python development, fostering a culture of high-quality code.

Google | Mountain View, CA Jan 2018 - Dec 2020

Software Engineer

Technologies: Python, JavaScript, Angular, C++, SQL, Google Cloud Platform

- Developed core backend services using Python for Google Cloud Platform, focusing on data processing and API development, supporting various internal and external applications.
- Contributed to front-end development efforts, building user interfaces with modern JavaScript frameworks and laying groundwork for future React migrations, improving UI modularity.
- Engineered robust data pipelines and implemented automated testing frameworks for Python services, ensuring data integrity and system reliability.
- Collaborated with cross-functional teams to define software requirements, design technical solutions, and deliver features on time within an agile development environment.

Certifications

- AWS Certified Developer - Associate
- Certified Python Programmer (PCP)
- Professional React Developer Certification
- Advanced JavaScript and Front-End Development | Udemy

Education

Stanford University

Master of Science in Computer Science 2017 **University of California, Berkeley**

Bachelor of Science in Software Engineering 2016
